In the age of AI, I think it is very important for students to develop what they like and what they are good at. First, AI can do many simple tasks, but it cannot replace human creativity and passion. If students follow their interests, they can create new ideas. Second, knowing their strengths helps students choose better careers. This will make them more confident and motivated in the future. For these reasons, I think it is important for students to develop their interests and abilities in the age of AI.
